OFFER SHEET

Tree Sponsorship

Context & challenges

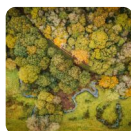

Forests are crucial in capturing carbon, preserving biodiversity, and providing ecosystem services like water retention and soil protection. However, they face growing threats from climate change, wildfires, and land degradation. At the same time, companies are under increasing pressure to take meaningful environmental action and contribute to sustainability goals.

EcoTree's Tree Sponsorship offers businesses **an effective way to take climate action** while supporting biodiversity and local development. By sponsoring trees in sustainably managed forests, companies help regenerate degraded land, restore ecosystems, and contribute to Europe's natural heritage. This nature-based investment **strengthens corporate sustainability, enhances brand reputation**, and generates measurable environmental and social value.

How it works

- **Financing the purchase & growth of saplings** from the nursery.
- **Participating** in one of the first stages of sustainable forest management.
- Working with **local nurseries**, located as close as possible to our forests.
- Supporting **afforestation or reforestation projects** in Europe.

Why choose EcoTree?

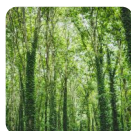

Sustainable forest management

We promote uneven-aged forestry with mixed-species and continuous forest cover

Local sourcing

We work with local partners to source sapling as close to our projects as possible.

No chemicals

We do not use pesticides or chemical products in our forest management.

Transparency & long-term monitoring

We follow, manage, and monitor the projects from start to finish.

A first step in taking climate action

- Tree Sponsoring is a **simple yet effective first step** to taking climate action by contributing to reforestation and afforestation projects in Europe.
- Supporting the creation and planting of European forests is a contribution to creating nature-based carbon sinks, which over long-time will help improve air and water quality, biodiversity and carbon sequestration.
- Tree Sponsoring is a means to help highlight territories and **support local businesses and communities**.
- Sponsoring tree planting help **raise environmental awareness** among consumers and businesses.

ECOTREE IN A NUTSHELL

European Leader in Nature-Based Solutions, EcoTree helps individuals and companies to commit to the environment by supporting protection, sustainable management and ecosystem restoration projects in Europe.
