

Our Label Bas Carbone certified credits

In 2019, the French Ministry of Ecological Transition launched the **Label Bas Carbone** to encourage companies to **finance carbon reduction projects** in France.

Among other things, the Label Bas Carbone makes it possible to **support forestry projects** in France, for **afforestation** (creating new forests) or **reforestation** (restoring forests).

Setting up an LBC project with EcoTree

Development & Certification

Identifying the **project's needs** (species and climate)

Defining the management plan and **guaranteeing** the project's sustainability

Quantifying CO2 emissions and certifying the project by the French Ministry for Ecological Transition.

Financing & contracting

Three-way contract between the company, EcoTree and the forest owner

Implementing the **sustainable management plan**

Project follow-up

Planting and management works **monitored** by our foresters: updates issued quarterly from a 1 to 5 years after planting then once a year.

Support in verifying carbon credits 5 years after planting and issuing the certificate.
